HOME COUTURE

Andrea Böck, interior designer and founder of Ambience Home Design, a leading interior architecture and design firm on the Costa del Sol, has over the last decade, worked on a variety of projects throughout Europe, the Caribbean Islands and Middle East, assisting her clients in the very challenging task of refurbishing, decorating and furnishing their homes down to the very last detail.

AMBIENCE
SINCE 2002

The curved line, without doubt, is the main Dune characteristic that has the Pedini imprint. Also, a clear Pedini trademark are the custom designed cooker hob/sink, that are integrated in the special shaped worktops.

HOME COUTURE

The optional back shelving unit is a great compliment to the Dune island following its curvy lines, and is an excellent option for open storage.

New system in the kitchen. The System Collection, combines shapes, colours and materials to express themselves in absolute freedom, and come together to create unusual and discrete structures. The organized and confident compositions are made to meet one's demands. Not only function, but also free movement within a creative space.

COOK
in Style

They say a kitchen is the heart of the home. It's where we entertain, where friends and family gather round to enjoy wonderful flavours and memorable moments, and where great recipes are brought to life.

However, we all know that a kitchen can be a bit of a dread, even for those who love to cook, especially if the layout is wrong or impractical. We spend a fair amount of time in our kitchens cooking and cleaning and we see the need to improve the space, and to make the most out of it. This is why we thought of featuring kitchens on this month's issue.

We'd like to show you some very cool designs that combine style, glamour, functionality as well as originality, and designs for both large and small spaces. So to any of you who are thinking of remodelling your kitchen, you may just want to have a peek for inspiration.

Cement has been defined as "the material of the New Renaissance" of modern buildings and has already become the protagonist of design collections. Tancelli was able to interpret and to build on the exceptional qualities of this material the creation of the prestigious collection Wind. The wooden backdrop also brings warmth and creates contrast.

Bulthaup have some great designs as well. Their philosophy is also very clever, their products do not follow any trends or fashions and are in the truest sense timeless in both their look and their feel - a factor which makes them always contemporary.

Open kitchen plans have become a dominating feature in apartments and most villas. Big kitchen islands and minimalistic feature backdrops create a spacious look and contribute to an easy workflow throughout.

Eggersmann is one of Germany's most innovative kitchen makers and has recently launched 5 new kitchen designs with a number of new upscale materials and finishes and a new generation of kitchens: The new kitchen system E 3.0 offers significantly more storage space and reflects the new demands for contemporary ergonomics.

Raw wood fronts, large stainless steel islands and unpolished slate floors make a great combination.

PURA EVOLUTION

Binova introduced a new concept: a kitchen in the living room. This concept, along with its pure and essential lines as well as its cutting edge design, is the key to Pura success worldwide.

A wide choice of gloss lacquers in handcraft brushed polyester, fine stones for the work-tops and innovative accessories inside the furniture provide Pura with additional options that meet more requirements and versatility. This new design and new materials provide a sculptural beauty through completeness and accuracy.

What's a kitchen without wine?

Having worked on countless refurbishment projects and as project manager for many years, I'm often asked for specialists in diverse areas to fulfill a particular job. So on the subject of everything kitchen, we also design alongside wine cellar masters that can custom make to any design and idea.
