SINCE 2002

COOK *in Style* CONTINUED

As a follow up to last month's Kitchen's article, I'd like to share a few more cool ideas of kitchen furniture and appliances.

First of all I think that a kitchen should have a great cooker, so let's start with **AGA**.

4-Oven AGA model

Iconic design and inimitable cooking performance aside, the beauty of this cooker is that it takes full advantage of off-peak electricity, storing it through the night in specially designed heat bricks located deep inside the cooker. The stored energy is then used to heat your AGA throughout the day.

Like all AGA cookers, the 4-oven 30-amp version is cast iron. It's this iron that radiates the heat through the ovens and hotplates, allowing it always to be instantly available for use and preventing food from drying out, while retaining its goodness and enhancing its natural flavours. The ambient heat it provides keeps kitchens and even adjoining rooms deliciously warm.

MIELE – Forever better

Founded in 1899, Miele's philosophy of manufacturing goods that stand the test of time continues to reflect on each of their designs and products.

Their wine cellar is simply stunning and very practical. It has a glass hanger and tray designed specifically for bottles of wine. It's also an inspired way to display your wine collection.

miele.es

Free-standing units from Miele create a very sleek, modern look.

Miele's MultiSteam

Perfection to suit personal tastes - the Miele steam oven is an all-round expert and the perfect partner for an oven and a hob. As the cooking times for steaming and boiling are identical, you do not have to change your cooking habits. You can make starters, soup, fish, meat, vegetables, side dishes and puddings on their own or together as part of a complete meal in one process. Individual preferences – firm or tender, moist or dry – can also be catered for in a Miele steam oven. Miele's MultiSteam technology with external steam generation ensures perfect results. Eight steam inlet ports enable fast generation of steam and steam distribution and therefore short heating times and uniform cooking results.

Pureline warming drawer – another great asset for those who enjoy cooking and serving. Receive your guests with warm plates on the table, then use it to warm your coffee cups or keep food hot.

And it goes without saying that their built-in coffee bean machine, OneTouch and OneTouch for Two, is a great choice for coffee lovers.

Fully-automatic perfection: one or two coffee specialities at the touch of a button. The OneTouch for Two function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be made at the same time. Using the OneTouch function and pressing the button twice produces two hot drinks in one process, delivered conveniently via the central spout.

Allmilmö

The ribbed fronts on this collection are very distinctive and original. If you want to add a bit of texture to your kitchen, this is a good choice.
allmilmoe.de

I also really like the industrial look and design in Allmilmö's collection.

And, for a riot of colour and curvy lines, the door fronts of the allmilmö model PIA in heather violet contrast splendidly with the surroundings in crystal white diamond lacquer. Also available in the complete RAL colour chart in high gloss or matte.

Poggenpohl

Since 1892, Poggenpohl has been on the forefront of kitchen designs with its quest to improve the kitchen. The innovative kitchen concept +ARTESIO offers an integrated solution that fuses furniture design, wall, floor and ceiling together architecturally. The result is an integrated space concept in which the aspects of building, architecture, home and kitchen all coalesce. The award-winning design of the +ARTESIO kitchen is defined by an innovative function arch: this produces an entirely new feeling of space that not only turns the kitchen into the centre of home life but also builds a visual bridge between cooking and living.

In September 2007 Porsche Design Group and Poggenpohl Möbelwerke GmbH presented their co-designed kitchen, Poggenpohl Porsche Design Kitchen P'7340. Aluminium profiles of different sizes, which permit individual styling, constitute the basic framework of the new kitchen. Within the aluminium frames, customers can position cabinet elements any way they like. The result is a modular, spacious and extremely versatile system of frames and carcasses that deliberately integrates clear spaces into the overall design concept.
